They are energy efficient, built to last, and rigorously tested to provide the reliability businesses need. 802.1p traffic prioritization and jumbo frame support allow for seamless integration with more sophisticated networks.

High quality components and Energy Efficiency

Unmanaged Gigabit switches are built with Top Quality components to assure a long life. Unmanaged switches are built to last, and rigorously tested to provide the reliability businesses need.

NETGEAR Unmanaged Switches also support the latest Energy Efficient Ethernet (IEEE 802.3az) standard, which reduces energy consumption when there is light traffic on an active ports or when there is no link or no activity detected. It can further save energy when a short cable is used.

PoE+ Support (GS108LP,GS108PP,GS116LP,GS116PP)

Power-Over-Ethernet (PoE) and PoE+ options available for powering IP Security Cameras, VoIP phones, wireless access points, and other Ethernet-powered devices.

These PoE+ Switches are not just flexible in terms of placement they are also flexible in terms of PoE Power. Thanks to the interchangeable external Power Supply and with a built-in PoE selector they allow you to increase or decrease the PoE budget at any time.

The flexible mounting system gives you the flexibility to place them in a desktop environment, mounted in a rack (accessories included) or wall-mounted.
