

APC InfraStruXure Operations 10 Rack License System management

Model: AP90010

Manufacturer: APC

EAN: 731304281214

Product Code: 217290

R44,558

Instant overview of data center operations through inventory management, PUE calculator, real-time device alarms, and location-based drill-down.

Standard Lead Time: Usually in Stock.

Availability

- Inventory management

Shows device data within the physical layout for instant access to device details and asset attributes, and overview of data center operations.

- Alarms within physical layout

Provides real-time device failures within floor layout and rack front view for status of data center operations.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

- PUE calculator

Provides Power Usage Effectiveness (PUE) value for information on daily utilization of energy.

- Mobile data center operations

Integrates with InfraStruXure Mobile for access to the InfraStruXure Operations application on the go via the Motorola (Symbol) MC70 handheld PDA.

- Inventory report

Includes structured information on all rack-mount devices, organized by device type, age, manufacturer and properties for quick overview of all current devices within a data center.

Convenience

- Recommended Actions

Providing descriptions of problems together with recommended actions reduces the need of training, eases deployment and speeds troubleshooting.

Manageability

- Customizable view

Provides location-based drill-down for a logical model of the data center, where data center rooms can be organized under regions, countries, campus, sites, buildings and rooms.

- Virtual store room

Keep track of new devices from arrival on site in the virtual store room, as best practices recommend.

- Floor layout view

View an accurate representation of your data center through the easy-to-use graphical floor layout and birds eye view.

- Rack front view

Detailed rack front view provides an accurate graphical representation of equipment and its location in the rack.

- Equipment browser

Quickly locate equipment based on vendor name, model and type, and export equipment data to excel format.

- Device catalog

Utilize the extensive library of physical infrastructure and IT devices from leading vendors.

- Custom devices

Quickly customize catalog devices to your specifications in just 2 clicks, amending custom properties

such as power requirements and MAC address etc.

- Free text search

Quickly locate devices and alerts through the free search field.

- Generic UPS support

Allows for modeling data from any UPS vendor, providing support for existing data center environments.

- Application scalability

Supports up to 1,000 racks and 50,000 IT assets, including 30 associated custom properties per asset.

Agility

- Model any data center

Capable of modeling data centers and rooms with rows in any direction.

- Common data model

Ensure mature and synchronized data throughout the entire data center life cycle.

- Electrical room support

Monitor capacity and plan changes for centralized power equipment in areas outside of the main data center floor plan.

- Optional deployment services

Ensure speedy deployment through the use of APC Professional Services.

- Localization

User interface available in major local languages.

- Integrates with InfraStruXure Management applications

Achieve integrated energy efficiency, predictive planning and real-time data center operations through the add-on InfraStruXure Management applications; InfraStruXure Operations, InfraStruXure Capacity, InfraStruXure Change, InfraStruXure Energy Efficiency, InfraStruXure Energy Cost & InfraStruXure Mobile.

Protection

- User roles

Enable different levels of access through multi-user login and pre-defined user roles.

- Multi-user access

Enables several users to carry out work on the application simultaneously.

- Password Security
