Model: AF611A

Manufacturer: HP

Product Code: 22779

R1,987 ~~R2,364~~

Do you need to share some key USB peripherals? Do you need to have control of as many as four computers from a single console?

The HP Workstation KVM Switches provide the flexibility and performance for small businesses to connect up to four computers and share peripherals. With the Workstation KVM Switches, you can easily share as many as three USB peripheral including DVD-ROM burners, printers, and scanners. You can connect multiple workstations to a single keyboard, mouse, and monitor. Support for both USB and PS/2 devices and the upgradeable firmware means that you can buy a KVM switch today that will work in the future.

New high speed USB 2.0 pass-through ability improves data transfer speeds when upgrading applications or operating systems. Flexible mounting allows the switch to work in table top or rack mount applications.
