For all you do—an all-in-one

The ThinkCentre Neo 30a Gen 4 (24" Intel) could be the perfect office companion. The all-in-one design—where the PC and display function as one unit—fits virtually anywhere. And it's powered by top-flight, 13th Gen Intel® Core™ processors with integrated graphics. Whether you're focusing on details, designing new products, or multitasking through everything at once, this flexible PC can help you do it all.

Small size, big productivity

Got a big job but a small desk? Tired of cables that seem to be everywhere? With a midsize, 23.8" FHD display, the ThinkCentre Neo 30a Gen 4 offers crisp, vibrant visuals with plenty of on-screen work area for productivity, while the all-in-one construction saves space and reduces cable clutter. It's a minimalist approach that users love and even extends to the packaging, comprised of 65% post-consumer recycled content and ocean-bound plastics.

Smart. Connected. Secure.

Ease of use is a hallmark of the ThinkCentre Neo line of all-in-one PCs. And the Neo 30a Gen 4 (24" Intel) delivers, with multiple USB and other ports for connecting accessories. But you get more than convenience—you get peace of mind, too. There's a theft deterring Smart Cable Clip and Windows Hello facial recognition software (requires optional IR camera).

Hello team! Good-bye background noise.

Finally, a computer that makes virtual meetings more enjoyable and productive. AI Meeting Manager improves audio, eases background distractions, and helps with post-meeting chores. For clear communication, there's AI-enhanced noise reduction, plus Subtitles and Translator tools. For less manual note-taking, try Voice-to-Text or Meeting Notes Editor. There's Alexa Show Mode, too, to make your PC a voice-activated smart display.

Ready to work, today & tomorrow

The ThinkCentre Neo 30a Gen 4 (24" Intel) all-in-one has features you need—and features you want. There's a handy retractable webcam you can pop-out to activate for office meetings or family video calls, then pop back in when you choose not to be seen. Memory and storage are less exciting but still important. With multiple HDD or SSD volumes and DDR4 memory allotments available, you can go big up-front or start small and expand later.

Stays cool—like you

Go ahead. Put your new all-in-one PC to work. The ThinkCentre Neo 30a Gen 4 (24" Intel) has our Intelligent Cooling Engine (ICE) 5.0, with four operating modes tuned for environments from everyday office cubicles to steamy work zones. Even if your job has you hot under the collar, ICE 5.0 keeps your PC running smoothly using virtual intuition to control power consumption and internal temperature.

Specifications may vary depending upon region / model.
