APC AP9710 IT infrastructure software Service management 10 license(s)

Model: AP9710

Manufacturer: APC

Product Code: 289456

R96,905

Workflow management allows for easily tracking and executing moves, adds and changes of equipment in the data center.

Automated work order process

Create work orders and automatically generate tasks to move, add or change IT equipment. Schedule, assign and track the status of itemized tasks to implement changes in the data center.

Change report

Instant visibility to all moves, adds and changes to the entire data center.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
