APC WEE3YR warranty/support extension 3 year(s)

Model: WEE3YR

Manufacturer: APC

Product Code: 290198

R414,496

7x24 telephone technical support

Our experienced technical support engineers are available to answer your questions, giving you peace of mind knowing the help you require is available at any given time.

Service warranty certificate

Customers receive assistance from the Service Entitlements team to ensure their product is properly recorded. An e-mail Service Entitlement Certificate provides a detailed record of the service registration, along with the service expiration date.

Software upgrades

Software support contracts entitle customers to all software upgrades and updates, ensuring access to new features and product enhancements.

Data Center Operation: Energy Efficiency Features & Benefits

Total cost of Ownership

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Energy efficiency analysis

Provides current and historical PUE and DCiE values based on the current IT-load for a fact-based understanding of energy efficiency at the facility level.

PUE/DCiE report

Provides a report on current & historical PUE/DCiE values, showing the effect of changing seasons and is suitable for both internal and external display.

Subsystem losses

Provides insight into energy losses and cost of energy at subsystem level, providing details of which subsystem draws the most costs.

Carbon footprint

Shows the CO2 footprint for each energy sub-system, for instant measurement of impact on the environment.

Protection

Password Security

User-selectable password with strong password rules and reset password mechanism.

Read-only Access

Share access without risking unauthorized configuration changes.

User roles

Enable location and feature-based access through multi-user login and individual levels of user roles.

Multi-user access

Enables several users to carry out work on the application simultaneously and merging changes from different users seamlessly.

Convenience

Easy deployment

Reduced installation time and costs with a minimum number of power meters required for deployment

Live dashboard

Gain transparency to data center key performance indicators through easily configured web dashboards, displaying customizable management-level information.

Multi-vendor data integration

Enables integration with 3rd party enterprise and building management systems, such as TAC by Schneider Electric, for data gathering, customization, and integration of PUE/DCiE calculations.

Web-enabled interface

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

shop.cssi.co.za | sales@cssi.co.za | +27 (11)541-9950

Created for easy integration with 3rd party web page through an open platform.

Availability

No measured data required

Utilizes measured or modeled data, allowing for usage with few or no power meters.

Power dependency editor

Provides an overview of the power path through the facility, including a hierarchical break-down of the power flow from where the power enters the building down to the main Power Distribution Unit (PDU).

Agility

Localization

User interface available in major local languages; English, French, German, Spanish, Russian, Traditional Chinese, Simplified Chinese, Japanese, Korean, Brazilian Portuguese & Italian.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
