

Goodram IRDM PRO gen.2 512 GB 2.5" Serial ATA III 3D TLC NAND

Model: IRP-SSDPR-S25C-512

Manufacturer: GOODRAM

EAN: 5908267923221

Product Code: 30980

R2,783

IRDM PRO gen. 2 solid state drives were designed for users, who demand the highest reliability and stable functioning. New IRDM Pro SSD is a refreshed version of our flagship disk Iridium Pro, which was already appreciated by clients from Poland and from abroad for its quality parameters.

High performance

SSD IRDM PRO offers solid parameters by reaching up to 555 MB/s for baseline data read and 535 MB/s for baseline data write. By using classic 2.5" form factor with SATA III interface, IRDM SSD can be widely adopted in older or less advanced applications that lack the PCIe connector or doesn't require the highest level of performance.

Feel the difference

If your computer is performing slower than you like, replacing the HDD with an SSD is one of the most cost-effective changes you can make. It will completely change your computing experience. SSDs are faster because they call up data more rapidly, so they accelerate boot-up times and app loading. You'll also experience less stutter when playing games, as the rest of your PC doesn't need to wait for game data to load.

Reliable 3D TLC

SSD IRDM PRO gen.2 provides best-in-class performance and reliability. The refreshed disk is equipped with 3D TLC NAND Flash memory and an excellent quad-core PS3112-S12 Phison controller. Detailed firmware guarantee full software data protection, consistency and security during use.
