

MEMORY DIMM

64GB DDR5-

6000/6000J3040G32GX2-

RS5K G.SKILL

Model: F5-6000J3040G32GX2-RS5K

Manufacturer: G.SKILL

EAN: 4713294232168

Product Code: 333127

R34,579

Ripjaws S5 is a high-performance DDR5 memory tailor-made for the latest Intel® Core™ processor platform. Using only best-in-class, hand-screened memory ICs that passed G.SKILL rigorous performance tests, each Ripjaws S5 memory kit strikes the perfect balance between performance, compatibility, and stability. Available in matte black or matte white aluminum heatspreaders, Ripjaws S5 is the ideal match in any PC build for enthusiasts, gamers, and modders who are looking for the perfect trinity of speed, capacity, and style.

G.SKILL is dedicated to develop ever-faster memory on each new Intel platform generation. Developed and optimized on the latest 12th Gen Intel® Core™ processors and Z690 chipset platform, Ripjaws S5 taps into the speed potential of DDR5 to bring a whole new level of performance to worldwide gamers, overclockers, and enthusiasts.

Built upon decades of experience in developing high-performance memory, the Ripjaws S5 DDR5 memory series is engineered with high-quality hand-screened ICs and designed for high-speed performance. In contrast with standard DDR4 frequency speed at 3200 MT/s, DDR5 significantly increased memory speed support to reach 4800 MT/s or higher. Whether you are a gamer, overclocker, or content creator, Ripjaws S5 is the ideal choice for experiencing the high performance of next-gen DDR5 memory.

The next-gen Ripjaws S5 series adopts a minimalistic chromatic design inspired by classic racing stripes and grills, available in matte black or matte white to match a wide variety of PC build themes.

Featuring a low-profile height of just 33mm, the Ripjaws S5 memory is an ideal choice for compact mini-ITX builds or systems with large CPU coolers.

DDR5 memory is designed to support increased module capacity, starting from 16GB per module and up to 128GB per module. This unlocks higher capacity limitations for a smoother workflow on demanding workloads, such as content creation, video editing, animation rendering, and scientific computing.

Just set and go. Programmed with the latest Intel XMP 3.0 profiles, the only thing between you and extreme performance is a simple setting. Additionally, XMP 3.0 enables two customizable user-defined profiles to be saved in the memory module via BIOS on supported motherboards, so your fine-tuned memory settings go wherever the modules go.

The memory kit will boot at the SPD speed when BIOS settings are at default.

Enable XMP/DOCP/A-XMP profile in the BIOS to reach up to the rated XMP overclock speed of the memory kit.

Reaching the rated XMP overclock speed and system stability depends on the capability of the motherboard & CPU.

- Dual Channel
- 64Gb DDR5
- Up to 6000 Mhz clock speed with high XMP profile
- XMP 3.0 Support
