Switch MIKROTIK CRS310-1G-5S-4S+OU PoE ports 1 CRS310-1G-5S-4S+OUT

Model: CRS310-1G-5S-4S+OUT

Manufacturer: MIKROTIK

EAN: 4752224007834

Product Code: 333334

R5,152

A remarkable outdoor switch for setting up an optical 10G network that can even perform some light routing. The spiritual successor to the beloved FiberBox. Gigabit Ethernet, SFP/SFP+, PoE.

netFiber 9 is a powerful outdoor switch with SFP, SFP+, and Gigabit Ethernet. It features a powerful ARM v7 CPU, 256 MB of RAM, 4x 10G SFP+ ports, and an advanced Marvell switch-chip that can handle even the heaviest loads. The Gigabit Ethernet port is not just for management purposes. It has a direct connection to the switch chip – so you can enjoy full gigabit speed. This port also supports PoE-in, so you don’t have to rely on the DC jack for powering in tight, hard- to-reach spots.

There is a console port, followed by five regular SFP ports and four SFP+ ports for that sweet 10

Gbps networking. This means there might be quite a lot of wires for you to organize at some point. That’s why we designed the case to have some handy little additional features on the bottom of the case to help you keep everything neat and tidy.

The sturdy case provides decent protection in dusty environments with occasional splashes of water. Perfect for outdoors with some light coverage – like a roof overhang or a simple cabinet. There is a massive heatsink on the back that serves two purposes. Not only it provides outstanding heat dissipation, it also moves the center of mass towards the side with all the mounting options – keeping the board firm and strong upon installation. The package includes metal hose clamps and screws, so you can attach the netFiber to a pole, wall, or mast right away.

netFiber 9 is an amazing tool for anyone working with connections over 100 meters while keeping data loss and ping low. Optic fiber can be a great alternative to copper if you are worried about electromagnetic interference or maybe even tampering and eavesdropping. With 10 ports, a powerful CPU, and a rugged case, netFiber 9 is a real bargain that will make your network management so much easier!
Summary: Mikrotik netFiber 9. Basic switching RJ-45 Ethernet ports type: Gigabit Ethernet (10/100/1000), Basic switching RJ-45 Ethernet ports quantity: 1. DC input voltage: 18 - 57 V. Power connector: DC-in jack. Power over Ethernet (PoE) | Vendor Homepage: https://mikrotik.com/product/netfiber_9#fndtn-specifications | Basic switching RJ-45 Ethernet ports quantity: 1 | Basic switching RJ-45 Ethernet ports type: Gigabit Ethernet (10/100/1000) | SFP module slots quantity: 5 | SFP+ module slots quantity: 4 | Power connector: DC-in jack | Ethernet LAN data rates: 10,100,1000 | Product colour: White | International Protection (IP) code: IP54 | Built-in processor: Yes | Processor model: 98DX226S | Processor frequency: 800 | Memory type: DDR3-SDRAM | Internal memory: 256 | Flash memory: 16 | Mean time between failures (MTBF): 200000 | Power source: DC | DC input voltage: 18 - 57 | Power consumption (max): 16.3 | Power over Ethernet (PoE): Yes | Operating temperature (T-T): -40 - 70 | Width: 304 | Depth: 212 | Height: 71 | Compliance certificates: CE/RoHS | Unit Calculated Weight: 2.5 | Product Net Weight: 1.9 | Unit Calculated Volume: 0.01166 | Units per Shipping Box: 1 | Shipping Box Height: 9 | Name: NET ROUTER/SWITCH 9PORT/CRS310-1G-5S-4S+OUT MIKROTIK | Model name: CRS310-1G-5S-4S+OU
