

External HDD LACIE Rugged Mini 5TB USB 3.0 STJJ5000400

Model: STJJ5000400

Manufacturer: LACIE

EAN: 3660619407927

Product Code: 333375

R6,488

Pros Trust the Rugged Family.

Since 2005, LaCie Rugged® portable hard drives have thrived where only the toughest survive — the film sets, photo shoots, and music studios of the world's most influential creative pros. Why? Because LaCie Rugged products are the industry's most trusted way to capture and transport data in the field.

Rugged Drives for All-Terrain Reliability.

From IP67-rated extreme water resistance to drop, rain, dust, and crush resistance — it's durability like this that keeps photographers and filmmakers coming back for Rugged drives. Compact, sturdy, and ready for anything, they're the ideal solution for transporting data on set, in the studio, and into the hands of your clients.

Go Laptop Free with BOSS.

When you need to back up, review, and manage content in the field — without a laptop — there's a special Rugged for that — Rugged BOSS SSD. Short for Backup On Set Solution, our BOSS drives let you directly back up files from SD cards and other USB devices and monitor transfer progress, capacity, and battery life via the built-in status screen. But the real game changer? The LaCie BOSS app. To view and organise footage on set, simply plug your iOS or Android mobile device into the drive, pull up the app and get to work.

Thunderbolt, USB-C, and USB 3.0 Ready.

A common scenario: You need to edit and deliver a project to a client, but you use a USB-C Macbook Pro and they use a USB 3.0 computer. What do you do? Simple — go for Rugged. This family of drives embraces a wide array of interface compatibilities so that you can edit, collaborate and share seamlessly.

Spacious Hard Drives.

RAID Versatility.

Blazing-Fast SSDs.

Say goodbye to long, drawn out transfers. Rugged hard drives, RAID solutions, and SSDs feature a variety of high capacity, high-speeds, and even NVMe-boosted performance so that you're no longer at the time-stealing mercy of RAW image files and high-resolution video. Transfer, edit, and hit your deadlines — faster.

Meet Our Professional SSD Solutions.

Encrypted Drives for Extra Protection.

Select Rugged drives come with government-grade AES-256 self-encryption thanks to Seagate Secure™ Technology — ensuring your ideas and hard work stay safe from unauthorised access and intellectual property theft.

Rescue Data Recovery Services.

When it comes to unpredictable events such as water damage to your studio or a natural disaster, we've got your back. Most Rugged portable hard drives include Rescue Data Recovery Services lasting the length of your warranty. We'll work tirelessly to help you save your data and money with one in-lab recovery service.¹
