have never experienced before.

Silky Smooth Visuals

When the action gets intense, precision is key. With up to a rapid refresh rate of 600Hz, experience ultra-smooth viewing with faster frame rendering and lower input lag to make better decisions, faster.

No Screen Tearing

Make screen tears a thing of the past. With AMD FreeSync™ Premium (application in progress), frames are synced with the graphics card’s frames perfectly, delivering visually smooth gaming experiences.

Lifelike Images

Bring your gameplay to life with VESA DisplayHDR™ 400 support – allowing for an expanded contrast ratio and color palette. Enjoy deeper levels of black and white contrast to create even more realistic and natural images.

Give Yourself a Boost

Feel the rush with up to a 0.1ms response time. Capture the essence of speed and precision with every frame rendered crystal-clear.

Eye Safety First

Get ready to settle in for those long gaming sessions. By utilizing Acer BlueLightShield™ Pro and Flickerless™ technologies, protect your eyes from unnecessary strain and fatigue so you can do even more before you take a break.

Hyper-Reactive Gameplay

Edge out the competition with even quicker reaction times. With ultra-low input lag, shave off precious milliseconds to always beat your opponents to the punch.
