LIV Plus Wireless is a perfectly balanced wireless mouse, optimized for ultra-precise and ultra-fast moves that let you beat your opponents down within fractions of a second. Once you're done with the battles (and the battery lets you do your job for 160 hours on one charge), you can just put it back on the docking station with a USB port connection. The anti-slip rubber keeps it in place.

The breathable body of LIV Plus Wireless is our in-house design. It merges great airflow with fast – and fully controlled – movement capacity. With endless skirmishes and esports tournaments in mind, we enclosed a top-notch PixArt PAW3395 sensor within it, providing max DPI of 26,000 and a tracking speed of 16.51 m/s. Just connect LIV Plus Wireless to your PC, console or telephone and that's it – just go for the win!
