This compact keyboard has all the ergonomic features you need for healthy typing. The compact design ensures that your hands always remain within shoulder width when using the keyboard and mouse simultaneously. The light keystrokes reduce muscle tension while typing. The keyboard is ultra-thin, so your hands and wrists remain in a relaxed, natural position while typing. This improves blood circulation in your hands. The R-Go Compact Break keyboard uses LED colour signals to indicate when it is time to take a break. While typing, the light changes colour, like a traffic light. When the light is green, it means you are working healthily. Orange indicates that it is time for a short break and red means that you have been working too long. By taking short breaks during your working day, you will increase your concentration, prevent strain and stay fit during your working day. This product works in combination with the R-Go Break Software, which won the Benelux Office Products Award 2021.
