

Graphic Tablet Huion H950P

Model: H950P

Manufacturer: HUION

EAN: 6930444800628

Product Code: 353031

R2,115

Graphic Tablet Huion H950P

The Huion H950P is a graphics tablet with a thickness of just 8 mm, which, thanks to its lightweight design (497 g), will be suitable for both desktop work and travel. It features the PW100 stylus, which does not require a separate power source, recognizes up to 8192 pressure levels and offers a ±60° tilt function. The device provides a wide range of creative possibilities for graphic designers, designers and digital drafters. The 221 x 138 mm working panel has been fully laminated, resulting in a more natural drawing experience. The tablet supports Windows, macOS, Linux and Android.

Smooth lines and fast response

The Huion PW100 stylus, which is part of the kit, supports up to 8192 levels of pressure, enabling precise mapping of movement and allowing for varying thickness and intensity of lines. The Huion H950P graphics tablet uses high-speed technology to read the stylus position at a rate of more than 220 points per second (PPS). As a result, every line appears instantly, and hand movements are faithfully reproduced without any lag effect.

Attention to every detail

The resolution of the stylus is 5080 LPI, and the reading accuracy reaches ±0.3 mm. Combined with the 10-millimeter height of motion detection, the tablet provides high precision and control over every line. Such technical parameters guarantee that the graphic design will faithfully reproduce every movement of the creator.

Natural shading and modeling

Huion H950P supports recognition of stylus angle up to ±60° - a useful feature for drawing shadows and brush effects, allowing to achieve a realistic effect, similar to working with a traditional drawing tool. Note: support for this feature depends on software compatibility.

Lightweight and comfortable to use

The PW100 stylus works on the basis of EMR (electromagnetic resonance) technology, so it does not require batteries or charging. It weighs only 16 grams, and its grip is made of durable silicone, which increases comfort and prevents accidental presses. It also comes with a PH03 holder with tip changer and storage space for the stylus.

Programmable buttons

There are 8 programmable buttons on the tablet's chassis, which can be customized for the most frequently used functions, such as changing tools or undoing operations. Such personalization speeds up work and keeps things running smoothly. The buttons can be deactivated with a side switch.

Greater work flexibility

The tablet works with computers and mobile devices running Windows (version 7 and above), macOS (10.12 and above), Android (6.0 and above) and Linux. The micro USB port allows you to connect the Huion H950P to a smartphone or tablet. The hardware supports popular graphics applications such as Photoshop, Illustrator, SAI, GIMP, CLIP Studio and Krita.

Included:

- Graphics tablet
- Stylus pen
- Micro USB cable
- Stylus pen holder
- Spare tip x8
- User manual

Manufacturer	Huion
Model	H950P
Dimensions	320.8 x 188.8 x 8 mm
Working surface	221 x 138 mm (8.7 x 5.4 in)
Weight	497 g
Touch function	-
Interface	Micro USB
Stylus pen model	PW110
Technology	without battery, EMR
Resolution	5080 LPI
Pressure sensitivity	8192 levels
Maximum tilt	±60°
Detection height	>10 mm
Reading speed	>220PPS
Accuracy	+0.3 mm
Buttons	8 programmable buttons
Compatibility	Windows 7 or later, macOS 10.12 or later, Android 6.0 or later, Linux
