Graphic Tablet Huion Q620M

The Huion Q620M is a graphics tablet that offers both wired and 2.4G wireless connectivity. With a large working area (266.7 x 166.7 mm) and a thin 8-millimeter chassis, the device combines work comfort with mobility. Windows, macOS and Android compatibility allows you to use it on a wide range of hardware - both for office work and on the go. A PW500 stylus with EMR technology is included.

Precise motion mapping

The PW500 stylus works with electromagnetic resonance technology and does not require charging. Responding to 8192 levels of pressure, it allows you to precisely control the force of application and get the right thickness and intensity of lines. The recorded motion is smooth and instantaneous - with a reading rate of more than 233 points per second and a resolution of 5080 LPI, every gesture is accurately reproduced. The device also supports tilt up to ±60°, so that - if the application supports it - it is possible to achieve a natural tool guiding effect, for example, when shading.

Ergonomics and personalization of work

The Huion Q620M is equipped with 8 programmable buttons and a functional dial that allows quick access to the most frequently used functions - such as zooming, rotating the canvas or changing the brush size. This configuration makes it easy to tailor the tablet to your own working style and increase efficiency.

Wireless connectivity and long working time

With the included receiver, the tablet supports wireless connection via USB 2.4G. The built-in 1,100 mAh battery provides up to 20 hours of use on a single charge, allowing you to use the device all day without having to plug in a cable. Power renewal is done via the USB-C port.

Included:

- Graphics tablet
- Stylus
- Stylus holder
- Spare tip x8
- USB-C cable
- Wireless USB receiver
- User manual

Manufacturer	Huion
Model	Q620M
