Phone and tablet compatibility

Inspiroy Frego S works not only with Android devices, but also with iPhones and iPads,among others. through the HiPaint and ibisPaint apps. What's more, the side buttons on the stylus can be set as convenient shortcuts in these apps, such as eraser, undo or tool change, making creative work easier. When combined with HiPaint on an Android device, the tablet automatically adjusts the aspect ratio of the work area to match the phone or tablet screen. This avoids scaling issues and ensures accurate reproduction of movements.

Lightweight stylus included

The included slim stylus is only 9.5 mm in diameter. As a result, drawing is more natural and stable. You can choose between different tips - a standard one and a felt tip, which better reproduces the feel of a pencil on paper. Two programmable side buttons allow you to quickly switch between functions, making your work more efficient. PenTech 3.0+ technology allows the stylus to detect as many as 8192 levels of pressure and respond to any change in force or speed of movement. This allows you to achieve a variety of lines and effects - from light sketches to firm strokes.

Refined to the last detail

The tablet's surface mimics the texture of paper, providing a natural drawing experience. This makes work more precise and less tiring for the hand. The gently sloping edges and the lower support for the wrist ensure that the hand does not get tired even during longer sessions, and thanks to the symmetrical design, the tablet is comfortable for both right- and left-handed users. The lack of function buttons on the case allows you to freely use your own keyboard and position the tablet as you are comfortable - without any restrictions.
