R4,696

Huion Slate 10 graphics tablet

If you're looking for a graphics tablet that combines the functionality of a classic tablet with the capabilities of a drawing device, the Huion Slate 10 may be just what you need. This 10.1-inch Android tablet is designed for budding graphic designers, kids with artistic souls and creatives who need a lightweight, mobile tool. The Full HD+ screen, sensitive stylus with 4096 pressure levels, long battery life and powerful processor make creating - wherever you are - even more fun.

An image that inspires action

The Huion Slate 10 features a 10.1-inch screen with a resolution of 1920 x 1200 pixels to give you a clear and detailed image. The 16:10 aspect ratio allows you to work comfortably in graphics applications, and the full lamination of the display eliminates the space effect between the glass and the image, giving you a more natural drawing experience. Working in a bright environment? The anti-glare coating will help reduce reflections for added comfort (not included).

A stylus that follows your imagination

The HS200 digital stylus with active capacitive technology and 4096 levels of pressure sensitivity is included. This allows you to precisely control the thickness of your lines and achieve an effect similar to working with a traditional tool. The stylus is equipped with two side buttons that - in the HiPaint application - can be programmed as shortcuts, speeding up your work and adding fluidity to the whole process. A palm-rejection function allows you to rest your hand freely on the screen without the risk of accidental lines.

Intuitive touchscreen

The Slate 10 works like a classic Android touchscreen tablet - you can use intuitive finger gestures, which significantly speeds up application navigation. It supports popular drawing programs like HiPaint and MediBang Paint, so you can start sketching, coloring and sharing your work right away.

Energy that can keep up with you

The tablet is equipped with a capacious 6000mAh battery that provides up to 7 hours of continuous use on a single charge. Charging time is about 3.5 hours, and the auto-brightness sensor helps conserve energy. That's enough to spend a creative afternoon away from home or complete a few assignments remotely without constantly reaching for the charger.

Fast, smooth, ready for anything

The Huion Slate 10 runs on an octa-core Unisoc Tiger T616 processor, which, combined with 8 GB of RAM, ensures smooth operation of Android 12 and graphics applications. 128 GB of internal memory means plenty of room for projects and applications, and the ability to expand up to 512 GB (with a TF card) ensures that you won't run out of space.

Mobile studio and creative space

The tablet weighs only 575 g and measures 243 x 161 x 8.6 mm, making it easy to fit in a bag or backpack. With Wi-Fi and Bluetooth connectivity, you can easily connect it to a keyboard, mouse or other devices. In addition, the presence of cameras (front and rear), speakers and a headphone jack
