RT-AX5400 leverages WiFi 6 to deliver faster and more stable internet to the growing multitude of smart devices in your home. The faster speed, higher network efficiency and capacity free you to connect as many devices as you need, while enjoying top WiFi speeds.
*The data compares speed of 4x4 WiFi 6 solution on 5GHz band to speed of 4x4 WiFi 5 solution on 5GHz band.

A Safer Browsing Experience

The internet can contain inappropriate content, intrusive ads or other dangers and safety risks. ASUS Safe Browsing helps block undesirable content in one tap -- no extra apps required. Its lightweight DNS-based filtering* won't affect router performance. It can even filter explicit content from search engine results to protect your kids online.
*By using Safe Browsing, you acknowledge and agree that the standard for blocked and filtered content is established by a third-party DNS provider.

Make Free WiFi Secure with Instant Guard

The free public WiFi you find in coffee shops, restaurants, hotels, airports and so on is rarely secure, and hackers can easily capture any digital information you send to the internet . The ASUS Instant Guard mobile app gives you one tap secure internet access via your RT-AX5400 router adding rock-solid security to any public WiFi connections you use. Our newly upgraded app even lets you easily share this worry-free network connection with your family and friends through a URL link.

Enhanced Security Anywhere

Complete Security for Your Home Network

Alongside the latest WPA3 security protocol, the ASUS RT-AX5400 also features AiProtection Pro powered by Trend Micro™, with automatic, regularly updated security signatures to protect your devices and personal data from internet threats.

Parental Controls at Your Finger Tips

Gain insight into your kids' online activity and customize settings for different age groups with RT-AX5400's robust parental controls. You can also flexibly schedule internet access with one click, or you can grant extra online time for your kids to reward their good behavior.

Network Control in Your Way

Easily setup and manage your RT-AX5400 router with the intuitive ASUS Router app interface. You can also access the Web GUI to explore advanced settings and unlock more router features.

Simple but Complete Functions

The easy-to-use ASUS Router mobile app offers simple setup and management for your RT-AX5400 router. There’s even more for you to explore with upgraded features including complete VPN settings, new parental control time scheduling, visualized connection diagnostics, and more.

Advanced Controls

If you want to take advantage of the advanced capabilities of the RT-AX5400, its powerful web interface gives you access to at-a-glance status reports and in-depth settings via a handy dashboard. You can use it to monitor web traffic, set up your router's QoS settings, manage ports, configure security features, and much more.

Flexible and Scalable Wireless AiMesh Networking

Does your router leave you with WiFi dead spots? RT-AX5400 supports ASUS AiMesh, a unique mesh-networking technology that creates a whole-home network using multiple ASUS routers. With easy central control and seamless roaming, even non-experts can set it up with any AiMesh-capable routers you own. Say goodbye to WiFi dead zones!
