featuring unique technologies that give you superfast, reliable and secure WiFi connections for your streaming videos, gaming and all other smart IoT gadgets.

Support 160MHz Channel

The ASUS ZenWiFi XT9 WiFi 6 mesh system supports 160MHz bandwidth*, boosting wireless network capacity and speeds. With a total bandwidth of up to 7800Mbps, it is up to 2.6X faster than tri-band AC3000 (WiFi 5) routers**.

Expanded UNII-4 Spectrum

ASUS ZenWiFi XT9 supports an expanded UNII-4 spectrum*, which features a third and clean 160 MHz channel on the 5 GHz band. This increases mesh backhaul capacity to deliver reliable and high performance for your wireless devices.

Wider Coverage

The latest ASUS RangeBoost Plus technology, along with the flagship Broadcom WiFi 6 chipset, significantly improves WiFi signal range and overall coverage by up to 38%*, offering expansive coverage in spaces up to 5700 square feet.

With ASUS AiMesh technology, it's easy to add extra network nodes for improved WiFi coverage or new features. Simply add any AiMesh-compatible ASUS router or repeater to expand your wireless network!

Easy Setup & Management

The ASUS Router mobile app with its intuitive interface makes managing your mesh WiFi system simple right from your smartphone.

3-Step Easy Setup

Simply follow the on-screen directions, and you will be up and running in no time!

Hands-Free Help

*Google Assistant is not available in certain languages and countries.

Flexible Backhaul Choice

ASUS ZenWiFi XT9 gives you flexible backhaul options: wireless or wired Ethernet speeds. You can use either the second 5GHz band or an Ethernet cable to connect to a local network node. Or just let the ZenWiFi XT9 choose the best connection type for you. The choice is always yours!

DEDICATED BACKHAUL

You can set the second 5GHz band to only handle mesh backhaul traffic, leaving the other bands open to maximize and stabilize WiFi speeds.

SMART CONNECT

In its automatic mode, the ZenWiFi XT9 mesh router intelligently assigns connected devices to the most reliable WiFi band available, providing a seamless WiFi experience.

ETHERNET BACKHAUL

When you connect your mesh routers using Ethernet cables, you can reserve all three WiFi bands for more stable and interference-free connections with wired backhauls.

Ultra-fast Wired Connection, Flexible Deployment

With a 2.5Gbps WAN port, the ASUS ZenWiFi XT9 empowers you to take full advantage of 2.5Gbps speeds offered by internet service providers for your compatible wired devices. You can also enjoy up to 2Gbps wired speeds by using the LAN aggregation feature.

Comprehensive Home Network Security

Home network security is more important than ever, as many households now have multiple connected devices while lacking appropriate security measures to protect them and their users. The ASUS ZenWiFi helps you stay safe online with our AiProtection Pro network security and Instant Guard secured VPN features.

AiProtection Pro Security for Your Home Network

Alongside the latest WPA3 security protocol, the ASUS ZenWiFi XT9 also features AiProtection Pro powered by Trend Micro and advanced parental controls, providing everything you need in one device.

Make Free WiFi Secure with Instant Guard

ASUS Instant Guard gives you one-click secure internet access via the ZenWiFi XT9 mesh router from anywhere in the world, thanks to its encrypted VPN tunneling technology. You can essentially take your home network with you wherever you go — while saying goodbye to third-party VPN subscription fees!
