R1,094

Perfect for a 100 Mbps Broadband

Shares with Wired Devices Flawlessly

One WAN port plus three LAN ports let you connect multiple devices via stable Ethernet cable without needing another network switch.

Connects 30 Devices Wirelessly

Enjoy high-speed WiFi together when your friends come with ample WiFi capacity. 2×2 MIMO enables devices to use both antennas to improve the experience.

No matter whether you want to connect to a public network expand a trusted network, or even use it as a Wi-Fi adapter (client) for your wired devices. It adapts to multiple scenarios like a breeze.

Easy Setup and Versatile Management

Easy to Use

An intuitive setup wizard guides you to config your new network.

Wi-Fi Schedule

Set a bedtime and a domain blacklist to regulate your children's online behaviour.

WireGuard VPN Client

Allows you to connect multiple devices at once to your private or commercial VPN.

Cudy Mesh Satellite

Works as a Mesh node with other Cudy Mesh device to enable fast roaming when moving between Wi-Fi zones.

A WiFi router with four Fast Ethernet ports allows smooth video playback and a maximum of 100 Mbps internet access, featuring Cudy Mesh and local app control.
