

Lenovo Intel Xeon E5-2650 v4 processor 2.2 GHz 30 MB Smart Cache

Model: 4XG0G89063

Manufacturer: LENOVO

EAN: 190151284166

Product Code: 406611

R1,377

Servers, workstations, and storage solutions based on the new Intel Xeon processor E5 family deliver the best combination of performance, built-in capabilities, and cost-effectiveness to make data centers more flexible and efficient. From virtualization and cloud computing solutions to design automation or real-time financial transactions, you'll be delighted by better than ever performance no matter what tasks you face.

Your investment in industry standard technology from Intel combined with innovative solutions from partners help future-proof your data center with infrastructure that grows with your business.

Technology to scale innovative private cloud services

Today's private clouds enable greater business agility and efficiency by delivering innovative and scalable services that drive value back into the organizations they serve. Building and managing these services require systems that scale to meet your ever changing needs, while delivering solutions to the challenges IT managers face every day. Server and storage platforms based on the Intel® Xeon® processor E5 family are built to be at the heart of today's data centers and enable powerful, versatile private cloud solutions.

New Intel® Xeon® processor E5: a new performance sweet spot

The Intel® Xeon® processor E5 family support key cloud requirements that make your data center agile and more responsive to changing business needs. Maintaining industry leadership for power efficiency and continuing Intel Xeon processor performance advancements, the Intel® Xeon® processor E5 family gives you additional performance when you need it for single- and multi-threaded applications, including increased floating-point performance for technical computing workloads.
