Model: 7G8F2AA

Manufacturer: HP INC.

EAN: 197192348000

Product Code: 407709

R1,377

Designed for growing gamers.

The HyperX Cloud Mini is a comfortable wireless headset built for upcoming gamers. Recommended for ages 8-12, it’s lightweight and appropriately sized for younger gamers, and more importantly, it’s designed to keep audio levels below 85dB[1]. With up to 25 hours of battery life, it’s perfect for flights, or gaming sessions[2]. Easy pairing over Bluetooth provides wireless freedom that means you won’t have to worry about cable snags and clutter. It features a clear, flip-to-mute mic so younger gamers can chat with their friends online, and it can be tucked away when not in use***. The earcups can be rotated when it’s time to take a break, and they’re also great for easy transport or storage. Cloud Mini Wireless can easily connect to Bluetooth compatible devices, as well as any device with a 3.5mm connection[4]. Whether your young gamer is playing on mobile, Nintendo Switch, PlayStation, PC, Chromebook, Steam Deck, or elsewhere, this versatile headset will be ready for it[5].
