WiFi 6 —

The Ultimate Gaming Power

Lower Latency | Faster Speeds | Energy Efficiency | Longer Range

WiFi 6 brings incredible speeds and coverage to your gaming network, and supports all your existing devices.*

*To benefit from WiFi 6 features, WiFi 6 clients are required.

Give Your Gaming Top Priority

- Gaming Port | - Gear Accelerator | - Game Boost

The dedicated Gaming Port on GS-AX5400 is a special LAN port that automatically prioritizes any wired device connected to it. You don't need to configure it, just connect your gaming PC or console to the gaming port to put it at the head of the queue for a fast, stable connection.

Easy port forwarding for different NAT types

With easy three-step port forwarding. it's never been simpler to improve your connection speed, lobby wait times, and overall gameplay — even if the host uses different types of NAT!

One-Tap Boost for Mobile Gaming

Tap to enable Mobile Game Mode in the ASUS Router app on your phone, and you're ready for full-speed mobile gaming, with minimum lag and latency!

No Limits!

With the amazing VPN Fusion you can run both a VPN and an ordinary internet connection — simultaneously! So even if other network users need to use a VPN, you can still enjoy maximum gaming speeds.

Everyone's Protected, Always

For total peace of mind, GS-AX5400 includes ASUS AiProtection Pro powered by Trend Micro™, with automatic, regularly updated security signatures to protect all your devices and personal data from internet threats.

Make Free WiFi Secure,

Wherever You Are

The free public WiFi you find in coffee shops, restaurants, hotels, airports and so on is rarely secure. ASUS Instant Guard uses VPN technology to create a secure data tunnel to your GS-AX5400, adding rock-solid security to any public WiFi connections you use.

Create a Whole-Home Mesh WiFi System!

ASUS AiMesh combines multiple AiMesh-compatible ASUS routers to create a whole-home mesh WiFi system with centralized control. You can use a single SSID for your entire home network, with seamless coverage and no more dead zones!
