Maxed-Out

Gaming Versatility

ROG Strix Scope II 96 Wireless is a full-function gaming keyboard packed into a 96% efficient layout to free up your desk space. Get ready for a premium experience with maximum versatility and unlimited options for customization. It features a tri-mode connection with ROG SpeedNova wireless technology and ROG Omni Receiver. It comes with hot-swappable pre-lubed ROG NX Snow mechanical switches and a unique silicone dampening foam design with integrated switch dampening pads for a great typing experience. It also features hotkeys for Xbox Game Bar and recording functions, and intuitive multi-function button with multiwheel. It also offers three tilt angle adjustments and a detachable wrist rest.

Versatile Tri-Mode Connection

ROG SpeedNova wireless technology offers up to 1,500+ hours of stable, uninterrupted near-zero-latency gameplay in 2.4 GHz RF mode (RGB and OLED off). Alternatively, you can use Bluetooth mode to connect to up to three devices at the same time, or charge and play simultaneously in wired USB mode.

ROG Omni Receiver

ROG Strix Scope II 96 Wireless is the first ROG keyboard to be equipped with the ROG Omni Receiver that allows wireless connection to one compatible keyboard and one compatible mouse at the same time with a single USB receiver – without compromising performance.

Hot-Swappable Switches

Swap and install your preferred switch type for a unique, customized feel*.
*Even though the switches are hot-swappable, we recommend not to swap the switches when the keyboard is turned on to prevent short circuits.

Advanced Sound Dampening

Unique dampening foam design with added switch-dampening pads to absorb pinging noises and echoes for improved keystroke acoustics.

ROG NX Mechanical Switch

ROG-exclusive gaming switch -

Tuned for great keystroke feel and consistency with fast actuation.

The switches have lubricated stems and base housings that offer a smoother click feel and eliminate spring bouncing noises respectively.

SNOW

REFINED LINEAR

ROG NX Snow mechanical switches utilize composite POM material for the stem with PC top housing and POM bottom housing to provide ultra smooth keystrokes, and the walled stem design enhances stability and prevents dust intrusion. Special tuning is also done, coupled with factory pre-lubing, to give the ROG NX Snow keystroke a very solid and clean sound, with “thocky” acoustics.

ROG UV-Coated ABS Keycaps

ROG UV-coated ABS keycaps utilize a layer of UV hard coating to offer greatly improved shine resistance.

*keycap material may vary by region

ROG PBT Doubleshot Keycaps

ROG PBT doubleshot keycaps provide a unique and premium feel, as well as offer long-lasting durability. Key design has been optimized with mid-height keycaps (similar to Cherry profile keycaps) and a shorter stem to reduce key wobble, and provide a more comfortable user experience.

*keycap material may vary by region

ROG Keyboard Stabilizer

A specially tuned, lubricated switch stabilizer greatly reduces keystroke friction, compared to traditional stabilizer mechanisms, giving you smooth and stable keystrokes for longer keys such as the Spacebar, Shift, and Enter keys.

Quick Access

The F1-F5 of the ROG Strix Scope II series have been mapped as hotkeys for Xbox Game Bar and recording functions.

Intuitive Controls

The multi-function button and multiwheel allows users to control media playback, adjust volume, and tweak keyboard lighting.

On-the-fly macro recordings

Record macros on the fly and map them to fully programmable keys.

Onboard memory

Save up to six profiles, including up to five custom schemes, and use them anytime, anywhere.

100% anti-ghosting & N-key rollover

Every keystroke is registered accurately, no matter how many keys are pressed.

Long-Hour Comfort

Detachable wrist rest.

Ergonomic Design

Three angle adjustments for optimal ergonomics.
