R9,241

Audiophile sound, fully immersive gaming

ROG Theta Electret is a cutting-edge gaming headset featuring electret driver technology paired with Essence airtight bass drivers for exceptional audiophile sound that immerses you more deeply in your games and connects you with the music you love. It pairs perfectly with DACs and amps. As an audiophile and gamer, ROG Theta Electret is a headset with no compromises, delivering top-notch sound and ultimate gaming immersion in a robust, high-quality design.

Electret driver and

neodymium bass driver

ROG Theta Electret is a cutting-edge gaming headset featuring electret driver technology that

delivers audiophile-grade sound with exceptional mid- and high- frequency response for true-to-life gaming audio and music-listening experiences. The headset also incorporates exclusive ROG Essence drivers with an airtight chamber design to deliver optimized bass performance that elevates gameplay with a new level of depth and realism. ROG Theta Electret pairs perfectly with high-end DACs and amplifiers to deliver pure, high-resolution sound.

Frequency Response

Electret drivers deliver dramatically improved high and mid frequency sound reproduction compared to neodymium magnet drivers, which are prone to interference from vibrations due to physical limitations of their design.

Silver-plated copper wire
for clearer audio
ROG Theta Electret features hi-fi-grade silver-plated copper wire for improved audio clarity with a large soundstage and exceptional imaging. With minimal energy loss compared to other types of audio cables, silver-plated copper wire preserves the high frequency range of the source material to deliver the best audio performance.

Specially tuned microphone

ROG Theta Electret comes with a detachable, unidirectional boom microphone that's specially tuned for clear voice communication and certified by leading communications apps. Signal-diversion technology ensures distortion-free in-game chat, and an intuitive control button on the ear cup lets you instantly mute the microphone without interrupting your game.

Expertly engineered comfort

ROG Theta Electret provides incredible comfort and sound isolation with ROG Hybrid ear cushions. Upgraded with a new, softer material, these cushions combine specialized, fast-cooling fabric and 100% protein leather for exceptional comfort and sound isolation. The fast-cooling design reduces heat by 25%, keeping you cooler during long gaming sessions. The cushions also feature an ergonomic reverse D-shape with optimized clamping force, for a firm, comfortable fit. For gamers who wear glasses, the cushions have a pressure-reducing design that eliminates the discomfort

common with headphones for improved gaming and listening experiences.

Two types of fit and feel

ROG Theta Electret comes with two types of ROG Hybrid ear cushions, so you can choose the fit and feel that's best for you. One pair combines protein leather and fast-cooling, breathable fabric mesh, and thin and soft — perfect for on-the-go gaming. The second pair is thicker but adds more fast-cooling fabric for extended comfort, making them ideal for marathon sessions.

Metal ear cup and yoke design

An aluminum-alloy ear cup and yoke design provides better heat dissipation and durability to stand up to the rigors of gaming and long-term use.

Multiplatform compatibility

ROG Theta Electret provides cross-platform support for PCs, Macs, mobile phones, PlayStation 4, Xbox One and Nintendo Switch.
