Engage 55

Portable. Productive. Professional. Engineered to make every call count.

INTRODUCING ENGAGE 55

Everybody’s talking

Have better conversations, both at home and in the office, with Engage 55. This intuitive headset is designed for those who spend most of their day in calls or virtual meetings, giving you an extensive

wireless range and the highest levels of security, for maximum peace of mind.

Whether you’re working from home or a busy office, Engage 55 will keep you sounding professional for every single conversation, no matter what’s happening around you.

WIRELESS RANGE

Free range (conversations, not chickens)

Whether you’re working from home or in the office, it’s nice to have the freedom to move around. Engage 55’s compact USB DECT adapter delivers a wireless range of up to 150m/490ft from your computer, and also makes it easy for you to move about with your laptop while you’re on a call.

Head to the kitchen for a coffee, or walk a few laps of the office, without worrying about whether your connection will hold.

DECT WIRELESS

Power. Range. Security.

DECT wireless is specifically designed for wireless communications, making it an ideal choice for call-intensive workers who need additional mobility. In fact, the DECT wireless range of Engage 55 is up to 15 times the average range of a Class 2 Bluetooth® device.

And if you’re working in a busy office, DECT wireless is built to withstand the density of large numbers of people working in the same place, so you’ll get a clear, robust, and secure connection for your conversations.

SECURE DECT WIRELESS ADAPTER

Like Fort Knox. But smaller.

However you’re working these days, if your conversations often include sensitive details, it’s important to know that the data is protected.

The ultra-secure wireless adapter for Engage 55 is DECT Security certified. But because your data security is so important to us, we go beyond the DECT Security Step C level with additional FIPS military-grade 256-bit encryption algorithms, to prevent eavesdropping and keep conversations secure.

PROFESSIONAL-GRADE CONVERSATIONS

This sounds serious

When you’re in back-to-back calls or virtual meetings, every word matters. Engage 55 features an impressive noise-cancelling microphone that helps block out background noise to keep you sounding like a pro, whichever office you’re working from.

The speakers are optimized for speech clarity, while wideband audio delivers crisp, crystal clear, natural-sounding calls. So you can wave goodbye to crackly, robotic-sounding voices, and say hello to more engaging conversations

EASY USB CONNECTIVITY

Coffee to call in seconds

From the moment you first unbox your new Engage 55, you’re ready to start having seamless, easy calls. Just plug the pre-paired USB DECT adapter into your computer and you’re good to go.

With this easy-to-use, single-connectivity headset, you’re never more than a few seconds from your first call on your computer.

DURABLE ADAPTER

As flexible as your schedule

Whether you’re hot desking or switching it up between home and the office, our durable Link 400 adapter is built to withstand the demands of your day.

It’s designed to bend, reducing the risk of damage even if you leave it plugged into your laptop. Perfect for companies with clear desk policies, or workers who like a change of scenery.

LIGHTWEIGHT COMFORT

Long-day-proof

An uncomfortable headset can really distract your focus from the conversation. That’s why we’ve made sure Engage 55 is lightweight, with a low clamping force, to avoid pressure and heat build-up.

So even when you’re in back-to-back calls all day, you can rely on your headset to help you keep your cool.

SIDETONE

It’s oh so quiet

Nobody wants to be that guy shouting on all their calls. That’s why Engage 55 has adjustable

Sidetone built in.

By playing a little of your voice into your speakers as you talk, Sidetone helps you to regulate your speech volume, reassuring you that your microphone is working, and combating conversation fatigue.

HEARING SAFETY

It’s what we do

We’ve engineered Engage 55 with SafeTone™ 2.0, for superior built-in hearing protection.

What’s SafeTone 2.0 made up of?

- PeakStop™ prevents sudden loud audio spikes
- IntelliTone™ 2.0 limits overall audio exposure
- Speech Level Normalization and Intelligent Acoustic Shock Prevention maintain comfortable audio levels throughout the day

This advanced technology protects your hearing well-being, while also helping to prevent the virtual conversation fatigue that can result from poor audio.

UNIFIED COMMUNICATIONS (UC)

Works with everything

Whichever communication platform you use, Engage 55 is ready. It works with all leading Unified Communications (UC) and contact center platforms for a seamless experience, and is available in both UC and MS Teams variants.

FUTURE-PROOF

Always a step ahead

There’s plenty to love about Engage 55 from the word ‘go’, and our firmware updates will keep it running in peak condition.

Our Jabra Xpress and Jabra Direct software will keep your headset up-to-date and running as smoothly as the day you unboxed it, for many years to come.

BUSYLIGHT

Protect your focus

The built-in busylight on Engage 55 helps you wave goodbye to interruptions. Automatically glowing

red when you’re on a call, it shows anyone nearby that you’re in ‘do not disturb’ mode.

BATTERY & CHARGING

Ready when you are

With up to 13 hours of battery life, you’re unlikely to run out of juice mid-flow. But in the unlikely event that you do hear the dreaded ‘battery low’, easy in-call charging means you’ll never drop a call. Simply plug the cable in, and carry on the conversation.

Battery life for stereo and mono models is up to 13 hours. Battery life for convertible model is up to 9 hours.
Stereo and mono variants. Not recommended for convertible model.

MULTIPLE WEARING STYLES

Made for you (yes, you)

Because everyone’s preferences are different, Engage 55 is available in three different wearing styles to suit any working preference, with a stereo, mono, and a convertible model that comes with an earhook, neckband, and headband, so you can pick the style that suits you best.
