ZOWIE U2 mouse Gaming Ambidextrous RF Wireless Optical 3200 DPI

Model: 9H.N4KBE.A2E

Manufacturer: BENQ

EAN: 4718755092602

Product Code: 409940

R4,488

U2 Wireless Mouse for Esports

For Claw-Grippers; Multi-Angle Movement

Agility. Enduring Performance.

Curvy Sides; Agile Movement

Inward-curved design on both sides for agility and stability during mouse lift.

The left-side curved design, combined with the overall curve of the back, reduces the thumb angle, which supports a faster index finger click speed.

The right-side curved design facilitates easy placement of the ring finger, which promotes balanced force exertion on both sides of the hand and allows for better stability during mouse movement.

Easier Thumb Access

Through experiments with different shapes and positions, U2's side button design facilitates easier thumb access.

Reliability
Enhanced receiver reduces signal interference
The enhanced receiver offers improved stability of the wireless signal and minimizes frame drops and
stuttering stemming from wireless interference during gaming.

Others

The reception footprint of other receivers has no directionality making it difficult to determine the exact direction for optimum signal reception thus resulting in weaker signal transmission.

U2

The exclusive directional enhanced receiver increases the reception footprint toward the mouse which improves signal reception. A reduced range of reception at the back of the receiver can effectively minimize interference from signals originating in the rear.

Easy to use
The convenience of charging

The enhanced receiver doubles as a charging dock, preventing accidental cable disconnections during wired charging.

Plug and play;
No driver needed

Adjustable DPI / USB report rate / Lift Off Distance / Click response time / Motion sync
