Disinfectible Hygiene Keyboard with Numeric Pad

The AK-C7000 is a high quality, highly reliable notebook PC keyboard. The purification and disinfection capacity makes it a perfect fit in hospitals and at practitioners, microbiological laboratories as well as industrial environments. The silicone key membrane protects the key field against ingress of dirt and fluids. The AK-C7000 impresses with precise key actuation and accurate key guidance. It is highly recommendable for heavy duty type writing in dirt and hygiene critical operations. The AK-C7000 provides the following benefits for cleaning and disinfection:

- Thorough wipe disinfection of key field and keyboard
- Silicone key membrane with low key profile and self-containing, seamless surface

- CleanFunction allows to disable key field while cleaning (“Fn”+”Clean on/off”)
- Exchangeable key membrane for separate reprocessing (Disinfection, Steam Sterilization)
- Protection class IP68 for submersion cleaning and machine reprocessing (optional)
- Backlit key field for operation in dark environment (optional)
- Suitable for a multitude of hospital cleaning agents and surface disinfectants (VAH)
