Provide secure, high-speed access for each user without cross-room interference or weak zones. Designed to handle multiple users across closely packed rooms.

Hotel

Covers up to 60 m² (650 ft²), delivering fast, secure Wi-Fi in every guest room. Sleek design and easy integration with VoIP, IPTV, and other devices.

Office

Ensure reliable connectivity for each workspace or meeting room. Perfect for flexible, room-based deployments in modern offices.

Soft LED, Smart Control — Built for Modern Hotels

Soft-glow LED Design

The subtle LED indicator provides clear AP status while maintaining a sleek, minimalist design. It ensures visibility without disrupting the room's atmosphere or guest comfort.

Configurable Wi-Fi Control

By enabling Wi-Fi Control via the Cudy management platform, you can easily manage both Wi-Fi and LED simultaneously. (Note: By default, the LED button controls only the LED indicator.)

Effortless Wall-Mount Installation

Fits perfectly in a standard electrical box. It simplifies setup by eliminating the need for complex wiring or additional equipment.

Simplified IT Management

PoE Power Supply, Flexible Deployment

Simplify installation with Power over Ethernet (PoE)—run both data and power over a single cable. Powered via 802.3at/af PoE, and features PoE passthrough support for downstream IP phones or other devices. (Note: To ensure stable operation, use a power source compliant with 802.3at or higher. Insufficient power may cause system reboots.)

Manage Your Network with Cudy APP

With the Cudy Network Management Web/App, you can set up your network in just minutes, then monitor the status and manage it anytime from your phone. Set up the main Cudy Mesh router, then the connected AP will be automatically adapted into its Mesh network, no configuration needed.

Centralized AP Management

Easily manage up to 200 access points with Cudy AP Controller□ Model:C200P□ , enabling efficient batch configuration and firmware updates through a unified interface.
