Great fit and relaxing grip with many functions.

The Evoluent C Wired supports your hand in an upright neutral posture that eliminates forearm twisting. The Evoluent C Wired has many functions like five programmable buttons, a directly reachable DPI-button to adjust the pointer speed into one of the four different values (500-1000-1500-2000) that suits you best, the illuminated Evoluent logo turns off when the system is in power saving mode, and a lip which supports the little finger. The vertical shape is even more relaxing to grip, fits the hand perfectly, and guarantees superior comfort during your computer work.
