This affordable, high-performance router also enables businesses to secure their network whether in the office, at home or out on the road. You and your colleagues can stay connected to the office anywhere, anytime. Complete VPN features, as well as IPSec Hub and Spoke technology, ensures secure communication between mobile employees and offices.

OpenVPN

OpenVPN relies on SSL / TLS for authentication and encryption. Creating secure, remote site-to-site or peer-to-peer connections is a standard security technology. SSL is widely used to protect financial transactions, data transfers, emails, etc.

Web Content Filtering

The DSR series web content filtering feature to help administrators monitor, manage and control employees’ Internet usage. Static web content filtering helps to remove malicious objects such as Java applets, ActiveX, and cookies, or to block URLs by keyword. Dynamic web content filtering, which requires a license subscription, allows administrators to filter content from a list of categories. Multiple global index servers, with millions of URLs and real-time website data, enhance performance and maximize service availability.
