High-performance gaming keyboard—wireless, rechargeable and fast

With the CHERRY MX 3.0S Wireless gaming keyboard, victory is at hand: The high-quality keyboard with a sturdy, extruded aluminum housing can be connected wirelessly via Bluetooth® or the 2.4 GHz band, as well as via USB-A to USB-C cable, thanks to CHERRY Advanced Wireless Technology. In the incredibly fast gaming mode with a latency of less than 1 ms, you can take full advantage of your speed. Combine that with the tried-and-tested CHERRY MX mechanical switches, stylish RGB lighting and smart charging technology that allows you to charge the keyboard while you play and you'll be unstoppable. Step up your game with the CHERRY MX 3.0S Wireless!

Innovative design: Completely screwless

First of all, our CHERRY MX 3.0S Wireless gaming keyboard not only comes without cables, but is also entirely screwless. Its classy aluminum housing is manufactured using the continuous die-casting process. Subsequently, the circuit board on which the CHERRY MX switches are located is pressed directly into the housing. Designed retention points ensure that the wireless gaming keyboard does not rely on screws or an additional metal plate for stabilization. This gives it a minimalistic yet technical look. The high-quality housing as well as the rubber feet on the bottom make the keyboard especially stable. The completely abrasion-resistant key caps are double-shot in plastic or front-lasered, depending on the model.

For especially intense and sustained gaming sessions, equip yourself with our optional palm rest and screwable CHERRY AC 3.3 aluminum feet and give your wrists a break.

Wireless gaming power: CHERRY advanced wireless technology

Take advantage of the full CHERRY gaming power—even without cables with the MX 3.0S Wireless gaming keyboard! You have several connection modes to choose from, so you can select your favorite connection: Use the mechanical gaming keyboard in Bluetooth® mode and connect up to three different devices at once. Switch back and forth at the touch of a button. Thanks to the special Low Latency Mode (LLM), victory is within reach: This mode uses an extremely fast Bluetooth®

connection that is ideal for gaming.

In 2.4 GHz mode you connect the mechanical gaming keyboard wirelessly with a USB dongle and in wired mode you simply plug in the included USB-A to USB-C cable—minimum latency and maximum speed! Insanely practical: The wireless mechanical keyboard has intelligent charging technology that allows you to continue playing undisturbed even during the charging process.

Original CHERRY MX Switches for absolute precision

What would a CHERRY gaming keyboard be without the original MX switches? The mechanical CHERRY MX switches, which are manufactured in Germany, are not only absolutely reliable and precise, but with their more than 100 million possible actuations per key, they are also very durable and of high quality.

Vibrant RGB lighting in over 16 million colors:
Unobtrusive, single-color lighting, animated, multi-color effects or would you prefer customizable single-key lighting? The CHERRY MX 3.0S Wireless gaming keyboard boasts impressive RGB backlighting in over 16 million colors and numerous customization options. You can set a variety of lighting options and color effects directly from the Bluetooth® mechanical keyboard. When gaming, would you like more freedom in terms of lighting options? This can be easily achieved with our CHERRY UTILITY software. If you're not in the mood for bright colors or prefer something more discreet, simply turn off the lighting.

Practical special features for your gaming experience

To ensure flawless gameplay, we have equipped the Bluetooth® gaming keyboard with several additional functions: Thanks to Full-N-Key Rollover, you can be sure that all keys are read simultaneously and no input is lost. Incorrect inputs, on the other hand, are avoided by anti-ghosting. The WIN key lock helps prevent inadvertently executed Windows commands when you're in the middle of your game. If you don’t use the wireless keyboard for gaming, but for working, the lock can of course be easily deactivated again. The CHERRY button gives you one-touch access to the CHERRY website and CHERRY UTILITY software, which allows you to program the backlighting on your CHERRY MX 3.0S wireless gaming keyboard, among other things.
