

GIGABYTE GB- BPCE-3455 PC/workstation barebone 0.69L sized PC Black J3455 BGA 1296 1.5 GHz

Model: GB-BPCE-3455

Manufacturer: GIGABYTE

EAN: 4719331262150

Product Code: 460863

R3,812

Redefining the Desktop PC

Challenging the essence of how we define a desktop PC, GIGABYTE engineers have developed an ultra compact PC with a stylish design based on a brushed aluminum surface chassis. Ideal for a broad range of computing applications at home or in the office, the BRIX expounds sheer simplicity and convenience, sets a new standard for desktop miniaturization that makes it perfect as a discreet HTPC / multimedia hub, an ultra-low power PC for the family, an office PC or as a digital signage unit. The BRIX is an ultra compact, versatile DIY PC kit that redefines the desktop PC in terms of miniaturization with a form factor that is small enough (56mm x 107mm x 114mm) to sit in the palm

of your hand.

Intel® Celeron Processor

The new generation of Intel® Celeron Processors leverage the 14nm process technology. The new processors improve upon power consumption along with enhancements in performance for graphics and computations. For the BRIX the new Celeron processors deliver a 30% increase in performance and at least 35% better 3D graphics performance gen-over-gen. The system-on-chip (SoC) design provides an even smaller footprint than its desktop counterparts, making BRIX the ideal solution for thin clients, POS solutions, and digital signage.

Advanced Features For Power Users

The Brix is engineered to take full advantage of what the hardware and its UEFI BIOS are capable of. And therefore, it's designed to deliver the most intuitive and integrated operating systems in the world.

SuperSpeed 4K HD Entertainment

Supporting the Newest Standards in Multimedia

GIGABYTE ensures users won't be limited by the standards or connections on the BRIX, by including HDMI 2.0 and support for HDCP 2.2* users can rest assured that their device will be able to display content to its full potential. The BRIX supports native resolutions of 4K at 60Hz, presenting unrivaled visual clarity and stunning realism to owners of UHD displays.

Dual Display

With HDMI 2.0 and VGA output, the BRIX can power two displays simultaneously, making it a perfect choice as a high productivity PC in both working environment and home entertainment.

VESA Support

The BRIX is packed with wall mount adapter whether undergo rigorous testing for safety and reliability. The BRIX also bundled with a VESA bracket, it can easily be mounted behind a monitor or HDTV making it discreetly hidden from view. This offers a simple and elegant way to turn any VESA-
