Choose the version that best suits your setup and enjoy three different finishes.

HUANO mechanical switches

The MMG mouse features HUANO mechanical switches to achieve two vital features for any gaming peripheral: precision and durability. They offer an extended lifespan while speeding up keystrokes, ensuring your actions are precise at all times.

Grip-grain finish

The MMG's surface is designed with a non-slip grip-grain texture that improves grip and makes it easier to hold even during the most extreme movements. Forget about slippery mice that slide by accident: take control of your game and aim with the best precision.

Dynamic RGB Flow lighting

The MMG's LED lighting system emits an automatic dynamic RGB Flow effect that alternates colors to create spectacular shades. Enhance the aesthetics of your desktop during your gaming sessions and show off your setup with a wide range of colors.

Total precision in every action

The MMG's 3200 DPI optical sensor provides absolute precision in-game, making every movement completely fluid and allowing you to switch between 800 / 1200 / 1600 / 3200 DPI with its on-the-fly switch button. In addition, the MMG's lightweight design and finish combine to facilitate a firm grip.
