R13,700

Powerful OLED Visuals in a Compact, Portable Design

Experience exceptional image quality with the AG Neovo N1651 — a 15.6" 4K OLED portable monitor built for professionals and creatives who demand accuracy and clarity. Featuring 4K Ultra HD resolution and advanced OLED technology, the N1651 delivers precise colour reproduction, deep contrast, and lifelike detail for content creation, presentations, and remote collaboration.

Designed for portability without compromising performance, it includes dual USB-C ports, Mini HDMI, and a headphone jack for broad device compatibility. While slim and lightweight for easy transport, we recommend using external power via USB-C for stable operation. Whether you're working from a client's office, hotel desk, or creative studio, the N1651 provides a flexible visual workspace wherever productivity takes you.

Elegant Design in Every Line

Embrace minimalism with the N1651's crafted aluminum back cover, featuring a sleek italic crisscross pattern that epitomizes modern elegance. Ideal for the style-conscious professional seeking a blend of form and function.

Versatile Viewing Adjustments

Equipped with an adjustable stand, this monitor offers flexible positioning for optimal comfort and viewing in any setting, enhancing usability without compromising style.

Ultimate Portability

Tailored for life on the move, the N1651 weighs just 1.5 pounds (700 grams) and measures a mere 0.2 inches (4.7 millimeters) at its thinnest point. Its compact, feather-light design slides effortlessly into any travel bag, ready to enhance productivity and entertainment anytime, anywhere.

OLED Brilliance

Leverage OLED technology for deep blacks and vibrant colours, presenting breathtaking visual quality that enhances both work and leisure.

Ultra-Sharp

Delve into the N1651's stunning 4K resolution, providing four times the detail of Full HD for crystal-clear graphic design, video editing, and high-resolution viewing. Complemented by a seamless 60Hz refresh rate, it ensures fluid, lag-free motion ideal for immersive gaming and dynamic presentations.

Deep Contrast

Experience depth like never before with a native contrast ratio of 100,000:1, providing the deepest blacks and brightest whites for crisp, clear details, even in the darkest scenes.

Seamless Motion

Enjoy smooth, fast-paced action and low-latency gameplay with a rapid response time of just 1 ms, coupled with blur-free text scrolling for an enhanced viewing experience.

True-to-Life Colours

Achieve full immersion with comprehensive colour accuracy: 100% DCI-P3, 100% sRGB, and 99.08%

Adobe RGB coverage, bringing your content to vibrant life.

Vivid HDR True Black

HDR True Black 400 readiness enhances your viewing experience with a broader spectrum of colours and greater brightness levels, perfect for HDR content.

Effortless Integration

Simplify your workspace with dual USB Type-C ports that provide 65W power delivery and two-sided charging. A single cable can handle power, data, and video, while mini-HDMI expands your connectivity options, ensuring unmatched versatility and convenience.

Tailored Viewing Experiences

Adapt to any scenario with specialized colour modes designed for various applications. Whether engaging in intense gaming or enjoying multimedia, find optimized settings like Movie Mode, Web Mode, and Text Mode. A specialized MAC Mode adjusts colours and brightness perfectly for Mac users, ensuring an optimal viewing experience.
