

Seagate IronWolf 110 960 GB 2.5" Serial ATA III 3D TLC

Model: ZA960NM10001

Manufacturer: SEAGATE

Product Code: 479519

R2,550 ~~R2,920~~

The Right Drive for NAS

Seagate® IronWolf® 110 SSD is built for NAS with capacities from 240 GB to 3.84 TB. Each drive includes AgileArray™ firmware to keep your NAS enclosure maximised for demanding 24x7 and multi-user environments, and can be used in an all-flash array or in a NAS capable of tiered caching.

Increase NAS Performance and Reliability

IronWolf 110 SSD is an enterprise-class drive equipped with DuraWrite™ technology, allowing for increased performance and reliability. Watch the following video to learn more about this fascinating technology.

Achieve Pure Performance in All-Flash Arrays

All-flash array systems can be fully utilised with sustained data rates up to 560 MB/s, which means your Synology FS3017 AFA will love these drives!

If you are a creative professional who urgently needs assets for editing or works in a high workload multi-user environment, IronWolf 110 SSD performance is there when you need it.

Attain a Competitive Edge with HDD and SSD

The IronWolf portfolio includes both hard drives and solid state drives for NAS systems. This allows you to integrate IronWolf 110 SSD for caching capabilities on compatible NAS, such as the QNAP TVS-951X, or for pure performance in AFAs.

Drive Health and Data Recovery

When integrated into compatible NAS systems, these drives provide overall system reliability increases due to IronWolf Health Management (IHM).
