R6,117

MHL 2.0 connection

The MHL and HDMI connections share the same ports, providing the VX2770Sml-LED flawless streaming from a variety of MHL and HDMI-equipped media devices. These include mobile devices, computers, set-top boxes, Blu-ray disc players, HD digital cameras, and gaming consoles. The MHL connection allows your mobile devices to use this monitor without turning on a PC/Laptop.

Frameless and slim design with intuitive touch keys

The frameless bezel on the VX2770Sml-LED removes the boundary between the real and virtual worlds, featuring an elegant and glossy finish to enhance any home or office setting. The sleek and seamless touch function key provides a simple and intuitive touch experience, making screen adjustments fast and easy.

SuperClear™ IPS for Super Wide Viewing Angles

The industry-leading SuperClear™ IPS Wide Viewing Angles technology delivers a 178° viewing angle from horizontal and vertical directions, while ensuring the vibrancy and accuracy of images. Brightness levels are consistent across the viewing angles, with no distortion or decay.

Full HD 1080p delivers perfect resolution

Brilliant pixel quality of the 1920x1080 Full HD panel reproduces refined and natural image quality to meet the requirements of computer applications of businesses, graphic design, video production, gaming, and HD video entertainment.

On-Live SRS Premium Sound® surrounding stereo

The dual 1.5-Watt speakers, powered by SRS Premium Sound® surround stereo, delivers an audiophile sound quality for anyone seeking a supreme audio performance and gaming experience. This eliminates the need for external speakers, thus optimizing desk space for better comfort.

30, 000, 000:1 dynamic contrast ratio for clear, sharp images

The superior dynamic contrast ratio of 30,000,000:1 delivers a broader range of grayscale, with darker blacks and brighter whites, while ensuring everything in between is depicted with explicit detail, for a rich and natural image.
