The demand for secure, high performance computing is driving the need for modern data centers that deliver a balanced IT infrastructure, workload acceleration, and data protection. Delivering the latest in server technology innovation, AMD EPYC 7002 Series processors provide businesses advanced security features and ground breaking application performance resulting in faster insights and value. Driven by the AMD Infinity Architecture, the AMD EPYC 7002 Family is the first x86-architecture server processor based on 7nm process technology, a hybrid, multi-die architecture, PCIe Gen4 I/O, and AMD Infinity Guard security features. Together, these innovative capabilities deliver what you need - performance leadership for your workloads. Designed with security in mind, EPYC 7002 series processors help protect your CPU, applications, and data - whether in your enterprise data center or the public cloud. And with the range of features you need to power your business, you can adapt your IT infrastructure to match workload challenges you face today and into the future.
