Manage your data your way with a wide range of storage options and seamless integration via Lenovo's XClarity management system.

Enterprise flexibility

The ThinkSystem ST250 V2 is designed with the flexibility to grow with your business. It utilizes highly expandable storage configurations, GPU support, multiple PCIe expansion slots to easily adapt as your requirements change.

Lenovo XClarity software provides easy-to-use systems management and dramatically reduces provisioning time, while an array of XClarity integrators allow utilization of XClarity through external IT applications to streamline IT management and contain costs.

This robust tower server includes end-to-end security provided by Lenovo ThinkShield. Securing your device, data, identity, and online solutions

Designed for remote use

Providing increased dependability for an environment without dedicated on-site IT support, the ThinkSystem ST250 V2, includes components that boost server uptime, and workplace productivity. It is easily maintained, reliable for remote server operation.

To add peace of mind for remote operation the ThinkSystem 250 V2 includes dual redundant power supplies, a lockable front bezel and Lenovo ThinkShield Security software.

The ThinkSystem ST250 V2's compact size and quiet operation is designed for discreet placement in remote office/branch office or retail locations.
