The HPE ProLiant ML350 Gen11 is a tower server engineered to meet the demands of growing businesses. It features a robust design that supports 2-way server scalability, allowing for the integration of up to two Xeon Silver processors. This ensures that the server can keep pace with your business's expansion, providing the necessary power and performance. Equipped with HPE SmartMemory, the ML350 Gen11 utilizes advanced DDR5 SDRAM technology to enhance data integrity and system reliability, making it suitable for critical business applications.

The server offers flexible storage solutions with eight hot-swap bays supporting SATA/SAS/NVMe drives, managed by the HPE MR408i-o Gen11 SPDM RAID controller. This setup allows for tailored
