TELTONIKA NETWORKS NTP001 NTP Server

Model: NTP001000000

Manufacturer: TELTONIKA NETWORKS

EAN: 4779051843275

Product Code: 523437

R3,645

The Teltonika NTP001 is a robust network time server designed for efficiency with a capacity of 300 NTP queries per second. Its built-in GNSS receiver and 16 MB NOR flash provide reliable performance in various applications, ensuring accurate time synchronization. With an operating temperature range of -40°C to 75°C and humidity tolerance of 10 to 90%, this device excels in demanding environments. Connectivity options include RS-232 and RS-485 interfaces, along with digital inputs and outputs, enabling integration into existing systems. The NTP001 complies with multiple standards such as CB, WEEE, and IP30, ensuring safety and reliability. Enhanced security measures include a variety of authentication methods and encryption algorithms, ensuring data integrity and protection against unauthorized access. The device features surge and over-voltage protection, along with anodized aluminum housing for durability. With support for multiple networking protocols and remote management options, the Teltonika NTP001 offers a solution for precise time management needs.

Product Description: Teltonika NTP001 - network time server | Device Type: Network time server | Form Factor: External | Processor: 1 x MediaTek MIPS 24Kec 580 MHz | RAM: 128 MB | Data Link
