

SYNOLOGY DX525 5-Bay Expansion Unit

Model: DX525

Manufacturer: SYNOLOGY

EAN: 4711174725298

Product Code: 523861

R12,387

The Synology DX525 is designed as a versatile storage enclosure that supports both 2.5" and 3.5" hard drives, accommodating up to 5 drives for substantial data storage needs. With a hot-swap capability, users can easily add or replace drives without downtime, enhancing convenience and efficiency in data management. The unit features a USB-C interface for quick and easy connectivity, making it compatible with modern devices while ensuring a reliable data transfer experience. Additionally, the built-in devices include a status LED for monitoring and dual 92 mm fans that maintain optimal operating conditions across a wide temperature range from 0°C to 40°C, all while operating in environments with humidity levels from 5% to 95%. Its Plug-and-Play design simplifies installation, making it an ideal choice for both personal and professional use, while a Kensington security slot helps safeguard valuable data storage.
