HPE iLO Adv Elec Lic 3yr Support

Model: E6U64ABE

Manufacturer: HEWLETT PACKARD ENTERPRISE

Product Code: 524094

R11,885

Integrated Lights-Out Advanced provides embedded hardware Graphical Remote Console capabilities that can turn a supported browser into a virtual desktop, giving the user full control over the display, keyboard, and mouse of the host server. The operating system-independent console supports graphic modes that display remote host server activities, such as shutdown and startup operations. It works with a standard browser and no additional software is required on the remote server or client system.

The USB-based Virtual Media feature allows an IT administrator to boot the remote server using a standard 1.44-MB diskette on the client machine, a CD on the client machine, or an image of the floppy from anywhere on the client's network. After the remote server has booted a USB-capable operating system, the virtual floppy or CD is available as if it were a local USB device. The Virtual Media features save time and increase efficiency by eliminating the need to visit the remote server just to insert and use a diskette or CD.

Product Description: HPE Integrated Lights-Out Advanced - licence + 3 Years 24x7 Support - 1 server | Product Type: Licence | Category: Networking applications - system & remote management | Licence Qty: 1 server | Bundled Support: 3 Years 24x7 Support | Distribution Media: Electronic | Service & Support: New releases update | Designed For: ProLiant DL160 Gen10, DL180 Gen10, DL20
