Arcserve Backup goes beyond backup, giving you highly reliable data protection with centralized management, data deduplication and cloud storage in a complete package.

Powerful, yet easy-to-use, it allows you to protect both physical and virtual servers with high-performance backup, data deduplication, integrated cloud storage, synthetic full backups, infrastructure visualization and Storage Resource Manager reports (SRM), granular restore of Active Directory objects and applications like Exchange and SharePoint and archiving.

Enhanced SRM reporting can tell you about potential problems before they happen - so you can proactively avoid unplanned downtime.
