R143,548

VMware vCenter Server provides a scalable and extensible platform for proactive virtualization management, delivering deep visibility into virtual infrastructure. VMware vCenter Server centrally manages vSphere environments and simplifies daily tasks, dramatically improving administrative control over the environment.

VMware vCenter Server is the universal hub for managing your VMware vSphere environment. vCenter Server provides unified management of all hosts and virtual machines in a data center from a single console. vCenter Server allows administrators to improve control, simplify day-to-day tasks and reduce the complexity and cost of managing an IT environment.

vCenter Server allows IT organizations to organize, rapidly provision and configure the entire IT
