Gaming at Your Coolest

Lenovo LOQ 15IRX9's hyperchamber thermal design is a game-changer. A sealed hyperchamber with dual fans spins in opposite directions, guiding cool air traveling inside the chamber. It prevents hot air from seeping into the rest of the chassis and expels heat efficiently from the rear end, pushing the envelope to a maximum TDP of 160W. This design not only reduces skin temperature and minimizes noise but also ensures an uninterrupted gaming experience, whether in an epic gaming session or a library's quiet zone
