

GENESIS Krypton 555 mouse Gaming Right-hand USB Type-A Optical 8000 DPI

Model: NMG-1839

Manufacturer: GENESIS

EAN: 5901969432220

Product Code: 607206

R1,531

Krypton 555 is an ultra-light, programmable gaming mouse equipped with the innovative Pixart PAW3333 optical sensor and extremely durable mechanical switches with a lifespan of up to 60 million clicks. The ergonomic shape protects the wrists against strain and the RGB lighting allows you to personalize your space.

INNOVATIVE SENSOR

The heart of Krypton 555 is the top of the range Pixart PAW3333 optical sensor, whose capabilities will satisfy even the most demanding players. A maximum cursor tracking speed of 300 IPS with a maximum acceleration of 35G will deliver incredible performance and instant response in every game. In addition, the DPI button with 6 settings will allow you to instantly adjust the cursor speed to your preferences in the range between 200 to 8000 DPI.

RGB PRISMO EFFECT

The mouse has been enriched with an extremely impressive RGB backlight with PRISMO effect, which will illuminate your stand in a colour of your choice and give it a phenomenal character. All settings for the backlight can be easily configured using dedicated software.

UNBELIEVABLE DURABILITY

The mouse is equipped with extremely durable mechanical button switches with a lifespan of up to 60 million clicks. Switches in combination with abrasion resistant Paracord cable will guarantee durability for many years of intensive use.

PROGRAMMABLE BUTTONS

Krypton 555 has 7 programmable buttons, thanks to which one click can unleash an advanced combo. Assign your favourite functions and shortcuts to individual keys, record macros and gain an advantage over your opponents!

ERGONOMIC DESIGN

The contoured design of the mouse and its ergonomic shape will not strain the wrist during gameplay, meaning that even the longest gaming sessions will not tire your hand. Ultra-light body (70 g) will guarantee maximum control during fast movements. The shape of the mouse will especially please players using 'Palm and Claw' grips.

DEDICATED SOFTWARE

The advanced Krypton 555 software enables efficient configuration of parameters and assignment of numerous settings to profiles. Change DPI sensitivity, customize multi-colour RGB lighting, create and save macros, and configure each of the 7 programmable buttons! Create the perfect conditions to win!

BUILT-IN MEMORY

The mouse has a built-in memory, so you do not have to configure the settings every time you start the PC. Krypton 555 will remember all your settings even when connected to another computer, so you can easily take your mouse on a trip or to a tournament.
