7.1 SOUND CARD

Equipped with high-quality 40mm drivers and a 7.1 sound card, these headphones provide a completely new audio experience during dynamic games, whether you play solo or engage in online skirmishes. With their pristine audio clarity and perfect positioning, you can expect the best results in even the most demanding games. These features allow you to accurately pinpoint the direction of every sound, giving you an edge in gameplay and immersing you in the world of the game like never before.

STUNNING LED DESIGN

The Radon 210 headphones are distinguished by their characteristic red elements and LED backlight, which will not only delight you but also impress those around you. With these headphones, you can not only play like a pro but also look like one. The stylish design of the Radon 210 headphones makes them a great addition to any gamer's setup, adding a touch of flair to your gaming experience.

COMFORTABLE GAMING FOR HOURS

To become the best player, you need to dedicate a significant amount of time to training. However, prolonged gaming sessions with headphones can become uncomfortable. Radon 210 headphones feature soft ear pads and a sponge headband, which reduces strain on the head

THEY WILL HEAR YOU CLEARLY

These headphones are equipped with an advanced microphone that provides crystal clear and appropriately loud audio in virtual worlds. With the Radon 210 headphones, you can be confident that every voice command will be understood by your teammates

FULL CONTROL AT YOUR FINGERTIPS

To play effectively, it's important to adapt your gameplay to the prevailing conditions. The Radon 210 headphones feature a remote control on the cable that not only allows you to adjust the volume but also turn off the microphone quickly. This is useful when you need to make a call or speak with
