Insanely responsive, and immensely customizable, the Turtle Beach Vulcan II TKL Pro Magnetic Mechanical RGB PC gaming keyboard delivers pro-level performance in a compact TKL form. Equipped with analog hall-effect magnetic switches for silky smooth, reliable key presses rated at a 150M click lifecycle and they have a fully adjustable actuation point from 0.1mm to 4mm. And with Rapid Trigger setting, you'll have better, more precise movement control, with less downtime between key presses. Lastly, the per-key AIMO™ Intelligent RGB lighting, five on-board profiles and adjustable actuation points can all be customized using the Swarm™ II desktop software.

Ultra-responsive magnetic switches are pre-lubed and rated at a 150M click lifecycle for silky smooth, long-lasting key presses. Hall-effect technology equips you with game-changing features like Rapid Trigger setting, controller emulator, adjustable multi-point actuation, and more.

Rapid Trigger Performance

Dominate your opponents in FPS and battle royale games with Rapid Trigger setting. Rapid Trigger eliminates downtime between key presses, so you can immediately repress, resulting in better movement control, responsiveness and faster aiming.

Per Key Sensitivity Adjustment

Adjust the actuation point of every key together or individually, with shorter key travel for faster response in shooters, or longer key travel for more deliberate, precise control. Each key has 40 presets heights from 0.1mm to 4mm and you can assign up to three inputs per key. Plus, for added convenience these can be adjusted all together using the keyboard or individually in the Swarm™ II desktop software.

AIMO™ Intelligent RGB Lighting

With double the refresh rate of a standard gaming keyboard, AIMO™ lighting technology produces smooth and vibrant RGB lighting effects right out of the box and can sync with other compatible AIMO™-enabled products.

Advanced Customization with Swarm™ II Software

Take your keyboard performance and aesthetics to the next level using the Swarm™ II desktop software. Adjust the AIMO™ RGB lighting, assign up to three different inputs per key, adjust key actuation points, enable Rapid Trigger setting and record & assign macro functions. And for even further customization, you can assign controller emulator features such as left analog stick control for precise, smooth 360-degree movements, in FPS, open world and adventure games, and assign left and right trigger control for gradual acceleration or braking in racing games.

5 On-Board Profiles

Save up to five on-board profiles for custom lighting, key re-assignments, macros, basic functions, Hotkeys and more.

Easy-Shift [+] ™ Button Duplicator

Our Easy-Shift [+] ™ technology adds a secondary function to compatible keys. Simply hold down the designated modifier key for double the command power in an instant, plus it’s fully customizable in Swarm™ II.

Advanced Anti-Ghosting

Advanced Anti-Ghosting technology is optimized for gamers to ensure reliable keystrokes every time, even when multiple keys are pressed at once.

3rd Party Keycap Compatible

The Vulcan II TKL Pro is equipped with T-shaped ABS keycaps and is fully compatible with 3rd party keycaps to customize your layout.

Tenkeyless Form Factor

The tenkeyless form factor lets you play in a more natural, comfortable position while allowing for a larger pad and more area for mouse movement, improving your aiming accuracy.

Push-to-Mute Volume Wheel

Control master volume on the fly, and quickly push to mute using the built-in dial.

Sleek, Award-Winning Design

An iconic design featuring an aluminum plate reinforces its structural integrity and protects against wear and tear. Plus, a double kick stand design with an included, soft palm rest ensures comfort over long usage.
