

Goodram UTS2 USB flash drive 16 GB USB Type-A 2.0 Black

Model: UTS2-0160K0R11

Manufacturer: GOODRAM

EAN: 5908267920350

Product Code: 611473

R889

Versatility and functionality are the most important features of UTS2. The durable housing with rotatable metal cover not only protects the stored data, but also ensures that there is no need to worry about lost plugs. UTS2, unlike similar products available on the market, is characterized by branded components and a lifetime warranty.

A classic solution

UTS2 housing is made of durable plastic. Thanks to the wide range of colors, each model is unique. An additional advantage is the rotating metal cover, which protects the flash drive and gives it a unique look.

Always by your side

The classic housing of UTS2 makes it popular among the supporters of practical solutions. The practical design of UTS2 makes it easy to attach it to a lanyard, allowing it to be used at any time. The rotary locking system and the lack of cap will allow even the most absent-minded users to enjoy the flash drive for a long time.

Solid housing

UTS2 housing is made of durable plastic. Thanks to the wide range of colors, each model is unique. An additional advantage is the rotating metal cover, which protects the flash drive and gives it a unique look.
